## NJSLA Results

Spring 2019 Administration

Measuring College and Career
Readiness

## South Orange-Maplewood Public Schools

October 28, 2019

## Purpose

In compliance with NJDOE mandates, the purpose of this brief presentation is to share with the public and Board our district's Spring 2019 New Jersey Student Learning Assessment data, including the following:

- Grade Year-to-Year Comparisons
- Multi-Year Comparisons for Single Classes
- Subgroup Comparisons

## New Jersey's Statewide Assessment Program

## NJSLA = New Jersey Student Learning Assessment

- Students take the NJSLA English Language Arts and Literacy Assessment (ELA/L) in grades 3-10.
- Students take the NJSLA Mathematics Assessment in grades 3-7, either the Mathematics Assessment or an End-of-Course Assessment in Algebra I or Geometry in grade 8, and an End-of-Course Assessment in Algebra I, Algebra II, or Geometry in grades 9 and 10.

## New Jersey’s Statewide Assessment Program

The NJSLA measures the extent of student progress toward college readiness or career readiness in its two subject areas.

- The ELA/L test assesses student proficiency in reading and comprehending a range of grade-appropriate material independently. It also provides a measure of how effectively a student writes when analyzing or otherwise using source material.
- The Mathematics Assessment measures competency in the major and additional/supporting mathematics content for the student's grade or course, as well as grade-appropriate mathematical reasoning and modeling skills.

## NJSLA and PARCC Comparisons

In previous years, students took the PARCC assessment. The New Jersey Department of Education introduced the NJSLA assessment this year as the PARCC's replacement. The NJSLA is shorter and more concise.

Note: Please keep in mind that since the NJSLA differs from the PARCC, our presentation can only show general trends. Comparisons of this year's NJSLA percentages to previous years' PARCC data cannot be considered completely definitive, only generally informative.

## PREVIOUS PARCC PERFORMANCE LEVELS

■ Level 1: Not yet meeting grade-level expectations

- Level 2: Partially meeting grade-level expectations
- Level 3: Approaching grade-level expectations
- Level 4: Meeting grade-level expectations
- Level 5: Exceeding grade-level expectations

## New NJSLA Performance Levels

Similarly, the NJSLA uses five performance levels to rate the knowledge, skills, and practices students have demonstrated on the assessment:

- Level 1 - Did not meet expectations
- Level 2 - Partially met expectations
- Level 3 - Approached expectations
- Level 4 - Met expectations
- Level 5 - Exceeded expectations

# State Averages vs. SOMSD Averages: 

## English Language Arts/Literacy

Overall, SOMSD exceeded the state in the percentages of students at Levels 4 and 5 in ELA/A in $3^{\text {rd }}$ through $5^{\text {th }}$ grades.

[^0]Our $9^{\text {th }}$ - and $10^{\text {th }}$-graders likewise exceeded state averages for Levels 4 and 5. Most $11^{\text {th }}$-grade students at CHS met the state's requirements for waiving participation and did not take the assessment.

## Highlights....

## English Language Arts/Literacy

- SOMSD outscored the state in grades $3^{\text {rd }}$ through $10^{\text {th }}$
- SOMSD $3^{\text {rd }}$-graders outscored the state average for students meeting and exceeding expectations by $+13 \%$
- SOMSD $5^{\text {th }}$-graders outscored the state average for students meeting or exceeding expectations by $+12 \%$
- SOMSD $6^{\text {th }}$-graders outscored the state average for students meeting or exceeding expectations by $+15 \%$

# State Averages vs. SOMSD Averages: 

## Mathematics

Overall, SOMSD students in $3^{\text {rd }}$ through $5^{\text {th }}$ grades exceeded the state in percentages of scores in Math at Levels 4 and 5.

For $8^{\text {th }}$ grade, although SOMSD has a higher percentage of students scoring Level 1 and Level 2 than the state average, this data does not reflect our overall $8^{\text {th }}$ grade class, as it does not include $8^{\text {th }}$-graders taking Algebra or Geometry.

SOMSD performed significantly better than the state in Algebra I, Geometry, and Algebra II.

SOUTH ORANGE-MAPLEWOOD'S SPRING 2019 NJSLA ADMINISTRATIONS IN ALGEBRA I, GEOMETRY, \& ALGEBRA II VS. NEW JERSEY

## Highlights....

## Mathematics

- SOMSD outscored the state in the majority of outcomes for $3^{\text {rd }}$ grade through Algebra II*
- SOMSD $3^{\text {rd }}$-graders outscored the state average for students meeting and exceeding expectations by $+13 \%$
- SOMSD $6^{\text {th }}$-graders outscored the state average for students meeting or exceeding expectations by $+20 \%$
- SOMSD Algebra II students outscored the state average for students meeting or exceeding expectations by $+22 \%$

## When attempting to compare PARCC and NJSLA year-over-year

 (same grade, different years)

We do not just analyze grade level to grade level annually; we also, and even more usefully, compare class years to
themselves in different grades to
look for growth or regression.

## When attempting to compare PARCC and NJSLA year-over-year (same grade, different years)

In the next table, when we follow
2017's $3^{\text {rd }}$-graders as they become
2018's $4^{\text {th }}$-graders and ultimately
2019's $5^{\text {th }}$-graders, we can analyze their trajectory of growth (while remembering that the NJSLA results may not offer an exact comparison to the PARCC results).

New state mandates do not require $11^{\text {th }}$-graders to take the NJSLA if they have previously passed the ELA 10 exam. As a result, only two juniors at CHS took this assessment in 2019.

ELA and Mathematics Assessment Graduation Requirements for the Classes of 2019, 2020, 2021, and 2022
This document reflects the high school graduation assessment requirements for the Classes of 2019, 2020, 2021, and 2022, pursuant to an amended Consent Order received by the NJDOE from the Appellate Division of the Superior Court of New Jersey on June 5, 2019.

The requirements for the Class of 2019, including the cut scores, remain unchanged from the requirements that were applied to the Classes of 2017 and 2018. These requirements now apply to the Classes of 2020, 2021, and 2022.

${ }^{2}$ Beginning on Monday, January 28, 2019, classic ACCUPLACER tests were no longer available. QAS replaced ACCUPLACER Elementary Algebra.

For questions or concerns, please reach out to assessment@doe.nj.gov.

Changes in state graduation mandates are impacting student data consistency.

## $5^{\text {th }}$-grade performance on the NJSLA Mathematics test as compared to past years' PARCC assessments

As previously noted, advanced math courses skew the $8^{\text {th }}$-grade results. For $6^{\text {th }}$-graders, however, performance improved on the NJSLA in
Mathematics when compared to previous PARCC assessments.

Performance on the NJSLA Algebra II assessment shows a very noteworthy increase when compared to the previous year's PARCC results.

When attempting to compare $3^{\text {rd }}$-grade NJSLA results in ELA/L to the previous year's PARCC results, every subgroup decreased in Level 4 and 5 achievement except for our Special Education population, which had an achievement increase of $+7 \%$. The achievement gap between the Black and White subgroups is $39 \%$ (NJSLA) compared to $32 \%$ for 2018 (PARCC).

Relative to last year, the percentage of $4^{\text {th }}$-graders scoring at least Level 4 in ELA/L is similar ( $1 \%$ difference). The gap between the Black and White subgroups decreased from 38.3\% on the PARCC to $30.8 \%$ on the NJSLA. The Black subgroup increased their achievement levels on the NJLSA by $5 \%$ when compared to PARCC.

## Highlights....

With regards to the achievement gap between Black and White students assessed, we observed the following:

- The achievement gap decreased for 10 different gradelevel/subject matter assessments, including
- A 36\% gap decrease in Algebra II;
- A 21\% gap decrease in Algebra I; and
- A 10\% gap decrease in Geometry.
- The achievement gap increased for 5 different gradelevel/subject matter assessments, including
- A 7\% gap increase in $7^{\text {th }}$-grade Math and
- A 6\% gap increase in $5^{\text {th }}$-grade Math.

## Purpose revisited

In compliance with NJDOE mandates, the purpose of this brief presentation is to share with the public and Board our district's Spring 2019 New Jersey Student Learning Assessment data, including the following:

- Grade Year-to-Year Comparisons
- Multi-Year Comparisons for Single Classes
- Subgroup Comparisons

[^1]:    *As noted, the higher percentage of $8^{\text {th }}$-graders scoring Level 1 and Level 2 than the state average does not reflect the overall performance of the $8^{\text {th }}$ grade, since students taking Algebra or Geometry significantly outperformed the state on those end-of-course assessments.

[^2]:    * Note: Approximately 30,000 New Jersey students participated in the PARCC Algebra 1 assessment while in middle school. PARCC Math 8 outcomes are thus not representative of grade 8 performance as a whole.
