Unit Ventilator Assessment 5

SUMMARY

During the October 19, 2020 Board of Education meeting, after verification from the Facilities Department lead, it was shared that the classroom unit ventilators were serviced. Unfortunately, the district's extensive inspection and investigation revealed that this was simply not true. Work was not conducted as reported.

Since that time, work began to inspect, clean, repair and install new filters for each classroom uninvent. Spiezle Architectural Group Inc., was commissioned to undertake an assessment of the Classroom Unit Ventilators in the 11 schools of the South Orange Maplewood School District. The first assessment Served as a snap shot to inform on the progress of work and to determine if any additional issues needed to be addressed. another inspection was scheduled and completed the week of January 11, 2021 at the following locations:

- Clinton Elementary School,
- Columbia High School,
- Jefferson Elementary School,
- Maplewood Middle School,
- Marshall Elementary School,
- South Mountain Elementary School,
- South Mountain Annex,
- Seth Boyden Elementary School,
- South Orange Middle School,
- Montrose Early Childhood Center, and
- Tuscan Elementary School.

This evaluation was undertaken in an effort to characterize the condition of the existing ventilation systems within each classroom and learning spaces, including but not limited to,

the status of each unit, its cleanliness, and the condition and type of filters.

This assessment was conducted by representatives of the Spiezle Architectural Group, Inc. along with facility staff. Each unit was opened to reveal the interior of the unit and each filter was examined for the type and condition. The units were checked for level of cleanliness and operation.

Facility conditions are impacted by a number of factors; such as the age of the units, maintenance practices, budget constraints, and the intensity of use. Although visual inspection can generally determine overall condition it cannot determine the level or efficiency of existing units, the amount of outside air being provided, or even the quantity of circulated air.

Our preliminary assessment identified deficiencies as summarized below under each heading:

OPERATION OF THE UNIT: FILTER STATUS: CLEANLINESS OF THE UNIT: OUTSIDE AIR:

OPERATION OF THE UNIT:

Each unit was inspected to determine if it was operating. There were three conditions of operations; Running, No Motor, and Not Running. It is to our understanding that some motors were recently removed and sent out for repair or replacement. These motors are due to be reinstalled within the next few weeks. This evaluation did not determine if the units were operating efficiently, or if they meet modern standards of operation. Units of this age were designed to provide 5 CFM per occupant instead of the 15 CFM per occupant in today's code.

Motor Running

| Building | Yes | No Motor | Not Running | Grand Total |
|----------------------|-----|----------|-------------|--------------------|
| Clinton | 23 | 1 | 7 | 31 |
| Columbia High School | 97 | 9 | 8 | 114 |
| Jefferson | 25 | 1 | 2 | 28 |
| Maplewood MS | 35 | 6 | 26 | 67 |
| Marshall | 24 | 2 | 5 | 31 |
| Montrose | 13 | 0 | 0 | 13 |
| Seth Boyden | 17 | 2 | 12 | 31 |
| South Mt | 15 | 3 | 7 | 25 |
| South Mt Annex | 8 | 0 | 0 | 8 |
| So Orange Middle | 41 | 3 | 10 | 54 |
| Tuscan | 24 | 7 | 4 | 35 |
| Grand Total | 322 | 34 | 81 | 437 |

A majority of these units have digital controls that were added some years ago, but are not working properly. It is likely that the units that we show as not running shut down when the temperature of the room is met. Or they are on a timer which would need to be corrected. It is also likely that the units have been turned off by request of the occupant due to the temperature of the room. These units are mostly scheduled to be replaced as part of the Bond project.

FILTER STATUS:

Each unit was inspected to determine the type, quality, and age of the filter. A majority of the filters were either temporary or nonexistent and have been replaced with compliant filters since the original inspection. It should be noted that the type and age of these units do not permit MIRV-13 filters. Filters were installed to the highest level allowed by the type of equipment. The table below reflects the latest inspection and represents if a filter is new and in compliance with the requirements of the unit. The filters that are not in compliance are due to be replaced.

| New Filter Installed | |
|----------------------|---|
| Building | Υ |
| Clinton | 2 |

| Dananig | 103 | 110 | iotai |
|----------------------|-----|-----|-------|

CLEANLINESS OF THE UNIT:

Each unit was inspected to determine the cleanliness of the units. It is very subjective, as it appears that all the units were vacuumed and a majority of dirt and debris removed. This does not mean they are clean, only that they are not filthy. The units that are marked as unclean should have additional cleaning done, both on the exterior and interior of the units.

| Tuscan | 34 | 1 | 35 |
| Grand Total | 379 | 58 | 437 |
| | | | |

OUTSIDE AIR:

Units of this type and age provided minimal outside air. A majority of these units provide outside air to some level. It was normal to set the damper to provide 10% while in operation. There currently is no real control over the amount of outside air that is provided. In some cases it is a fixed damper, likely set to 10%, and in others it is mechanically controlled by temperature and operation of the unit, and in other it is just a gravity damper that opens when the unit is running. There are several that have had the outside grill blocked off, probably due to the fact that there is no control over how open they are and are providing too much outside air causing the unit to freeze.

Outside Air

| Building | Yes | No | Total |
|----------------------|-----|----|-------|
| Clinton | 30 | 1 | 31 |
| Columbia High School | 114 | 0 | 114 |
| Jefferson | 28 | 0 | 28 |
| Maplewood MS | 57 | 10 | 67 |
| Marshall | 31 | 0 | 31 |
| Montrose | 13 | 0 | 13 |
| Seth Boyden | 29 | 2 | 31 |
| South Mt | 22 | 3 | 25 |
| South Mt Annex | 8 | 0 | 8 |
| So Orange Middle | 52 | 2 | 54 |
| Tuscan | 35 | 0 | 35 |
| Grand Total | 419 | 18 | 437 |

Classrooms should be provided with either operable windows or a mechanical means of providing outside air in order to be occupied.
